Yung Gravy
Young Thug, Future, Gunna
YOASOBI
Yng Lvcas
YEAT
YEAT
Yandel, Feid
Yandel, Feid
Yahritza Y Su Esencia, Grupo Frontera
Yahritza Y Su Esencia
Total

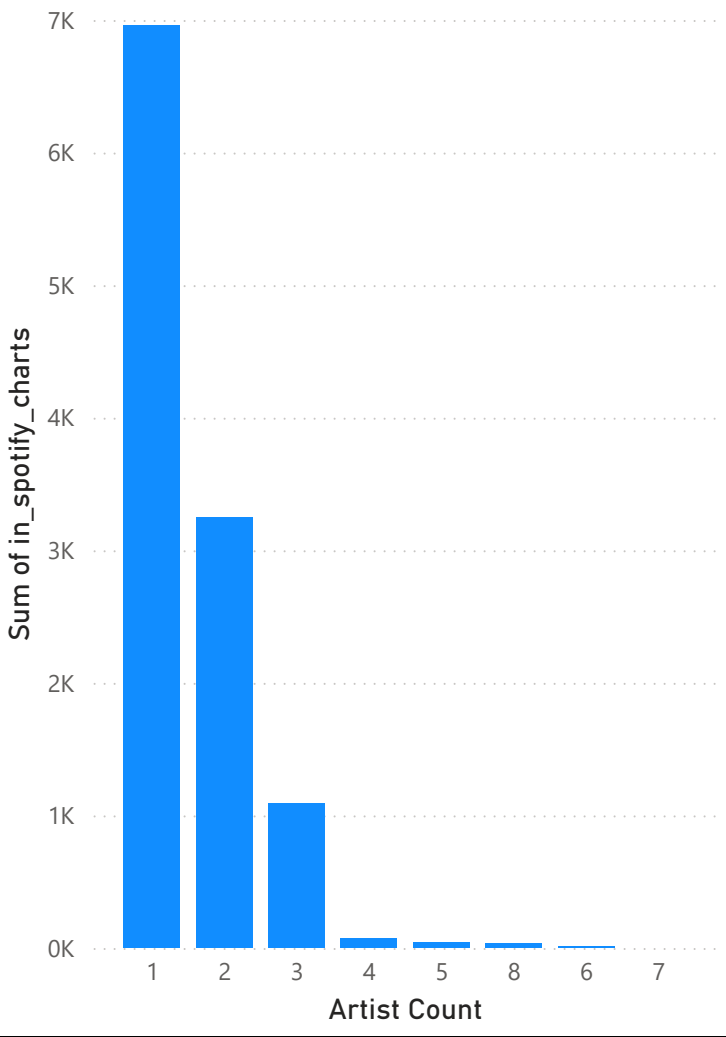

Platform Comparison :Graphs comparing Spotify, Apple, Deezer, and Shazam reveal that **Spotify leads in both playlist exposure and chart presence**, making it the most effective platform for promotion. Apple and Deezer show weaker reach, while Shazam functions more as a discovery tool.

Artist Impact

Objective

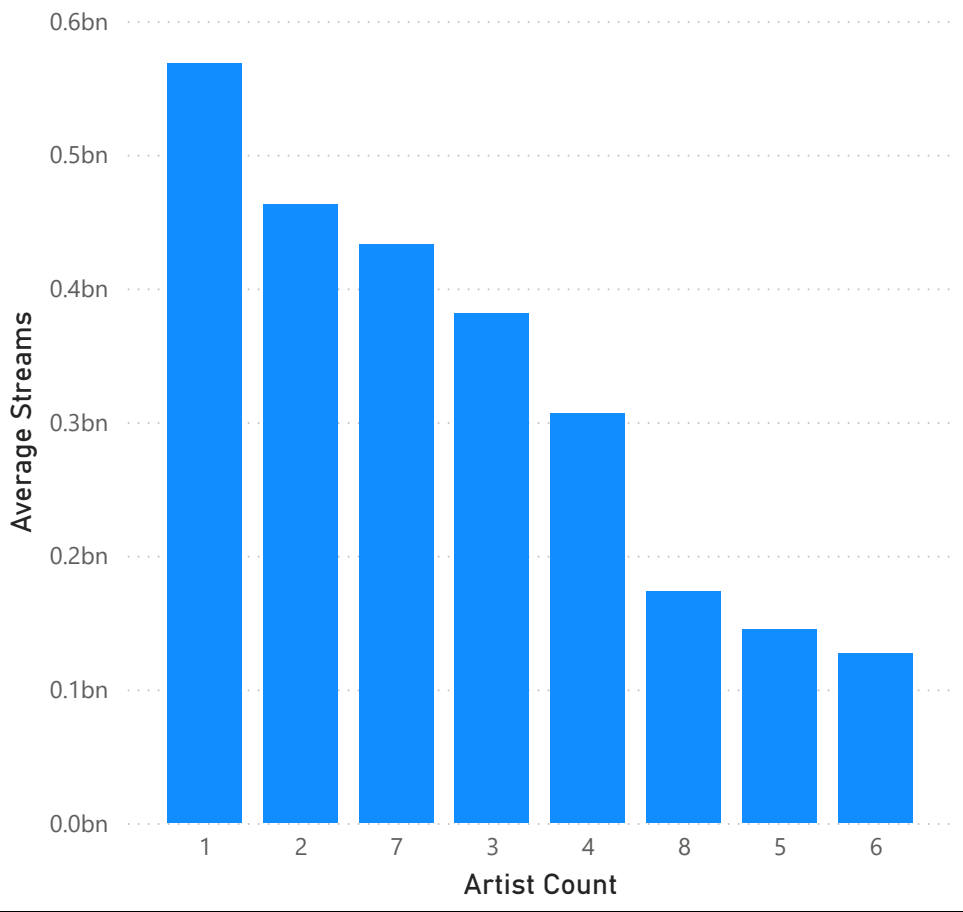

Investigate whether the number of artists involved in a song is associated with streaming, playlist and chart performance.

Artist Involvement vs Spotify Chart Presence

Artist Count	Average Streams	Sum of in_spotify_playlists	Sur
1	568,211,662.21	3406137	
2	462,480,785.79	1121456	
3	381,342,098.31	364216	
4	306,106,246.47	51053	
5	144,808,200.40	5142	
6	126,949,881.50	2220	
7	432,719,968.00	2785	
8	173,221,173.50	2710	
Total	514,137,424.94	4955719	

Artist Involvement vs Average Streams

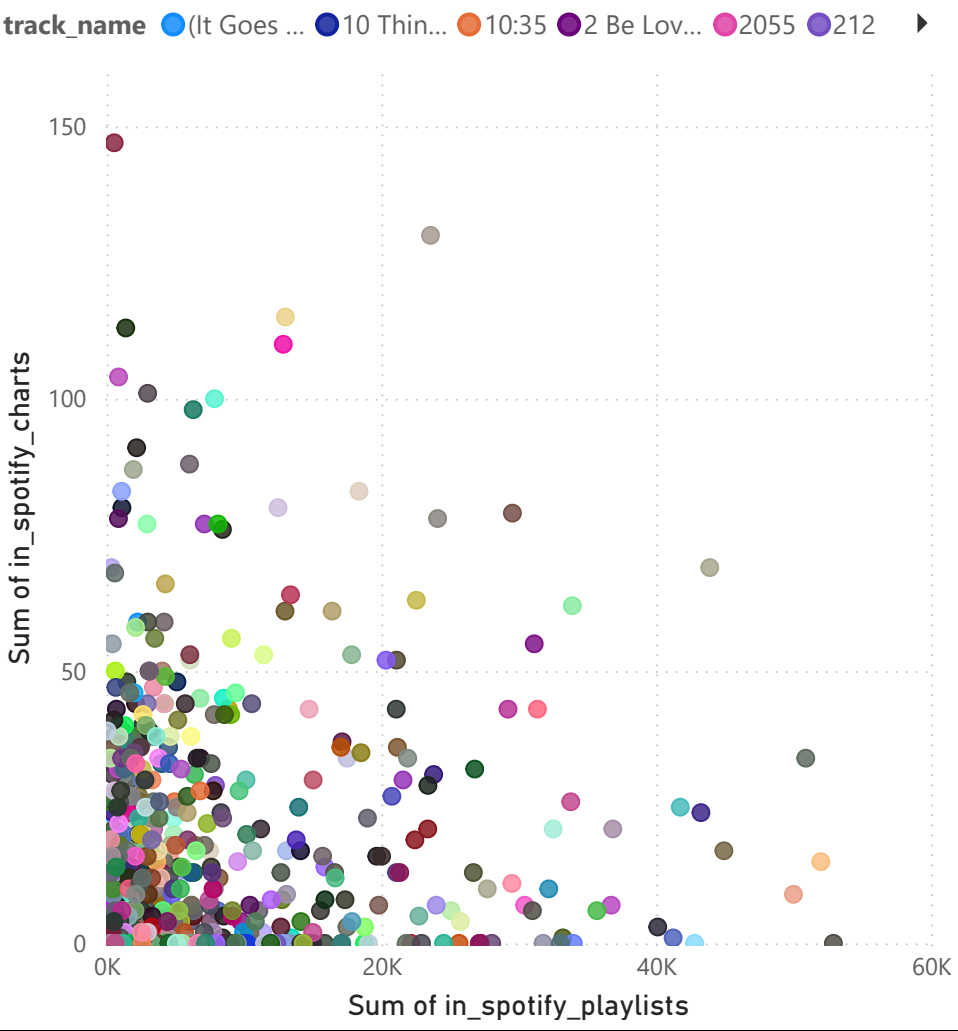

Artist Impact Analysis of artist count shows that **tracks with multiple artists achieve higher streams, stronger playlist exposure, and better chart rankings**. Collaboration emerges as a clear driver of visibility and commercial success.

Playlist Exposure & Chart Performance

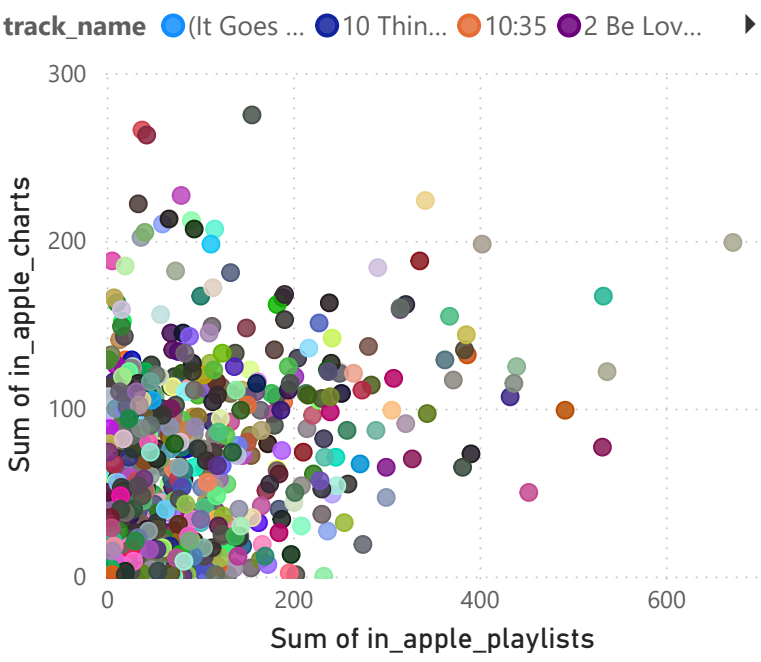

Objective

Investigate whether greater playlist exposure is associated with stronger chart performance.

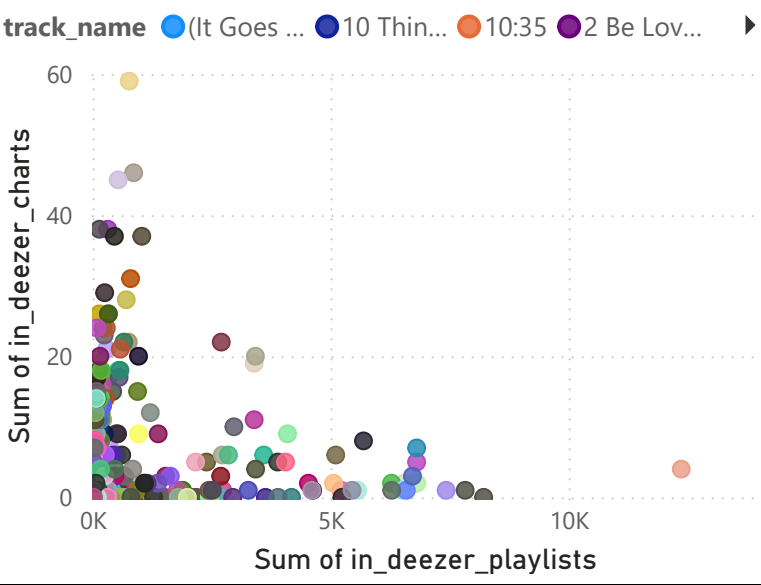

Spotify Playlist Exposure vs Chart Presence

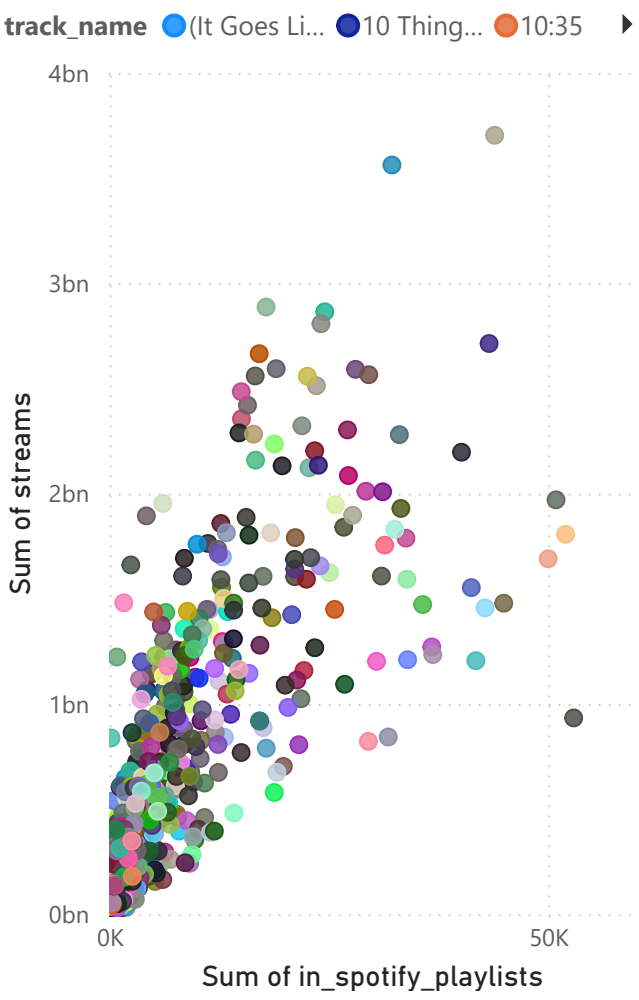

Apple Playlist Exposure vs Chart Presence

Deezer Playlist Exposure vs Chart Presence

Spotify Playlist Exposure vs Streams

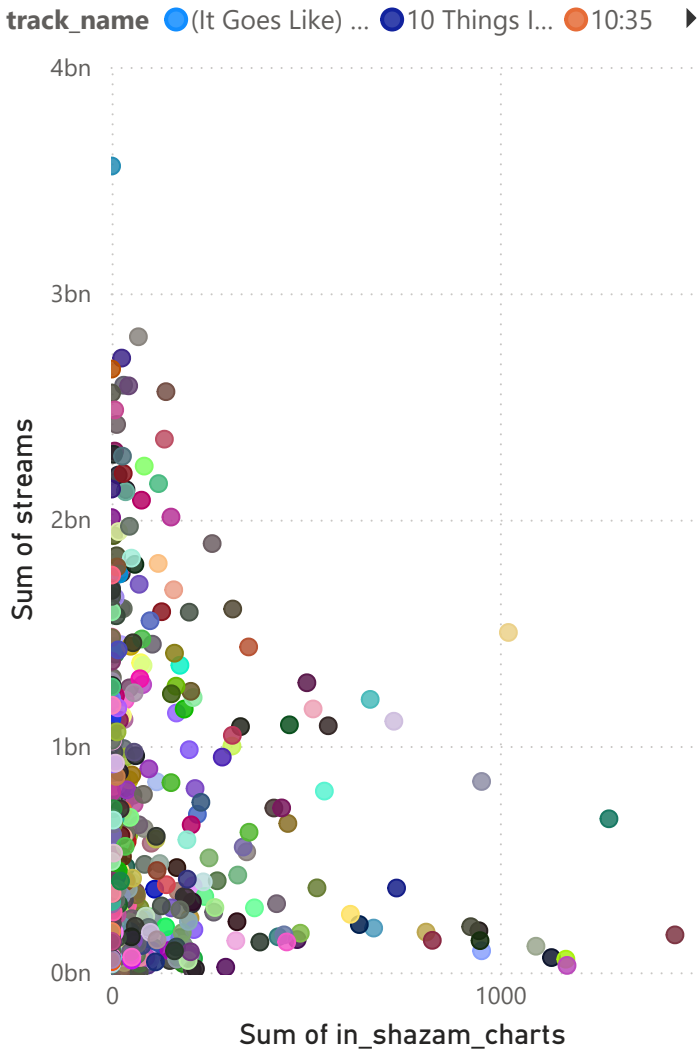

Playlist Exposure & Chart Performance
Across Spotify, Apple, and Deezer, the data shows a **direct correlation between playlist exposure and chart success**. Songs featured on playlists consistently perform better, underlining the importance of playlist placement in marketing strategies.

Shazam Discovery Analysis

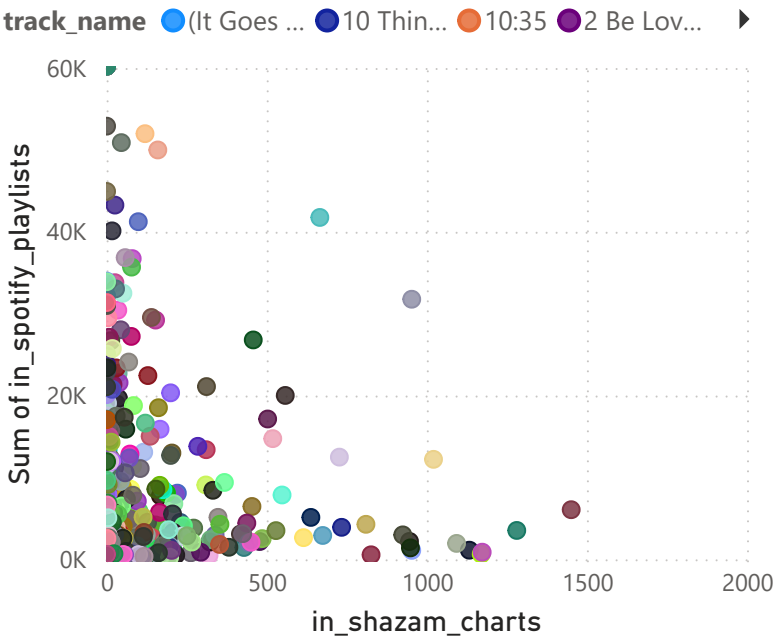

Objective

Investigate whether Shazam activity is associated with Spotify streams, playlist exposure and chart presence.

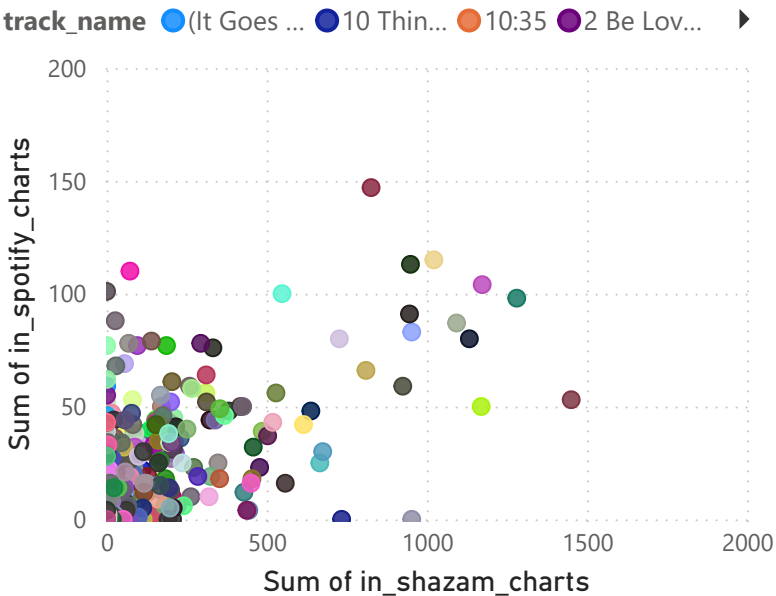

Shazam Presence vs Spotify Streams

Shazam Presence vs Spotify Playlist Exposure

Shazam Presence vs Spotify Chart Presence

Notable Shazam Performance Cases

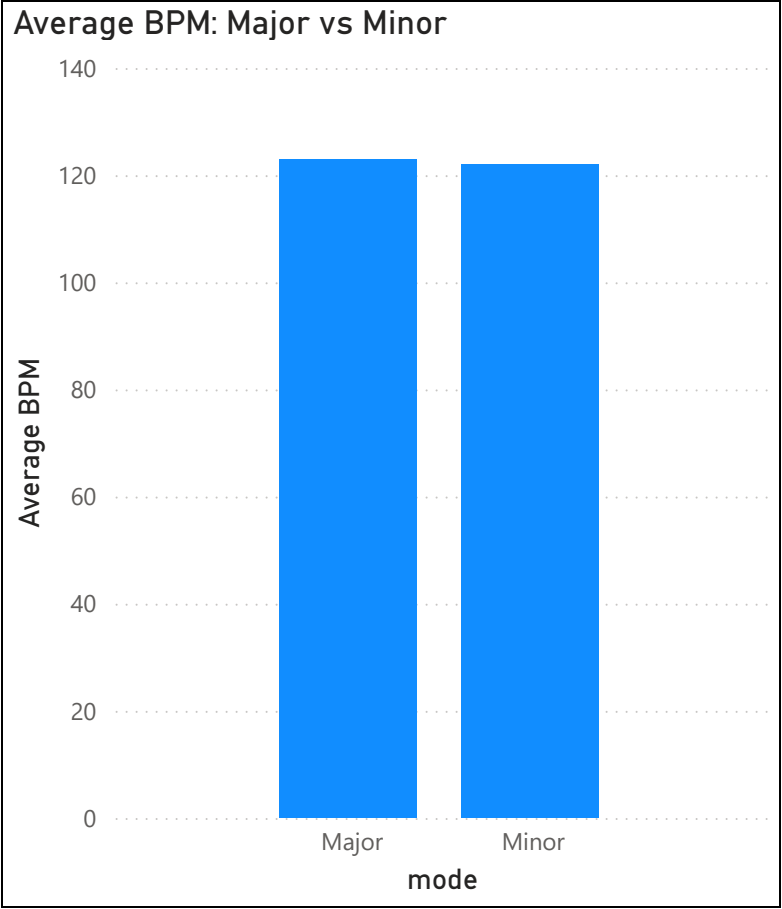

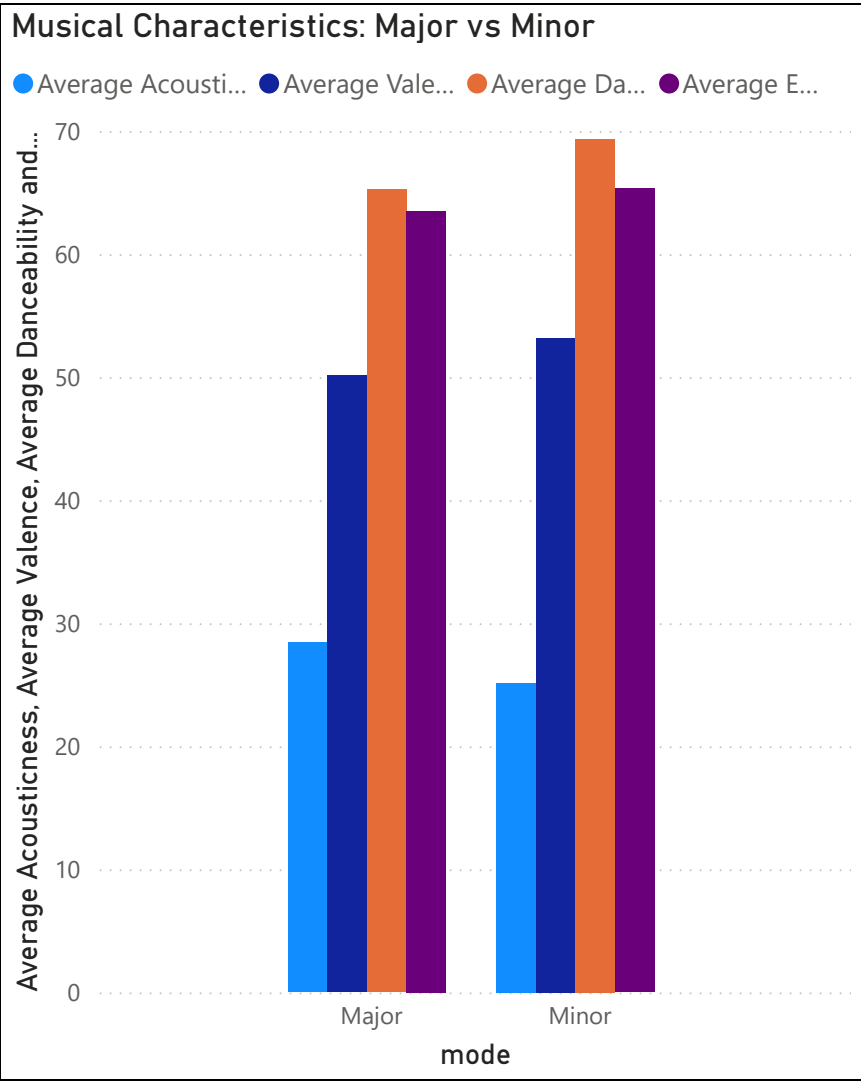

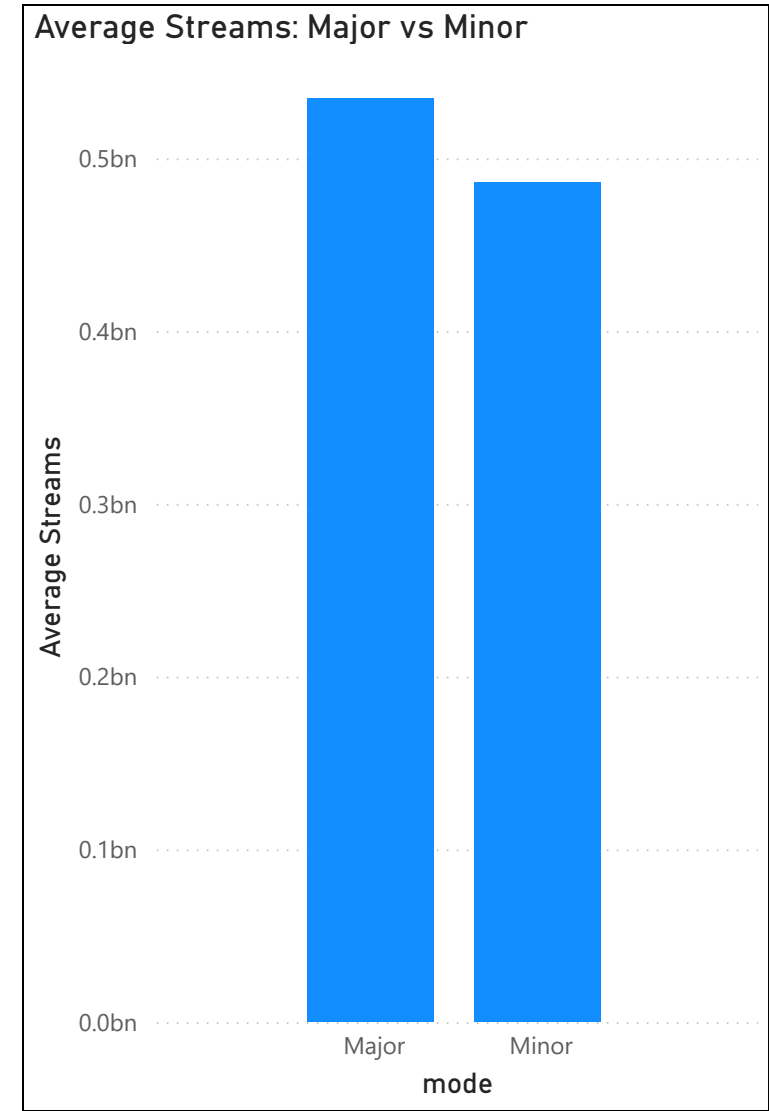

Sum of in_apple_charts	Sum of in_shazam_charts	Sum of in_spotify_charts
116	11	6
126	148	33
0	0	0
27		0
106	35	7
60	44	16
79	42	6
89		0
87	9	20
7	0	0
125	78	6
112	519	43
0	0	0
84	9	12
0	0	17
13	40	2
2	0	2
0	0	19
49469	54176	11445

Shazam Discovery Analysis Shazam presence is compared with Spotify performance metrics. Findings show that **songs with strong Shazam activity gain higher streams, more playlist inclusion, and stronger chart presence.** Shazam acts as an early indicator of potential hits.

Major vs Minor: Key and Mode Analysis

Objective

Compare Major and Minor songs in terms of streams and musical characteristics.

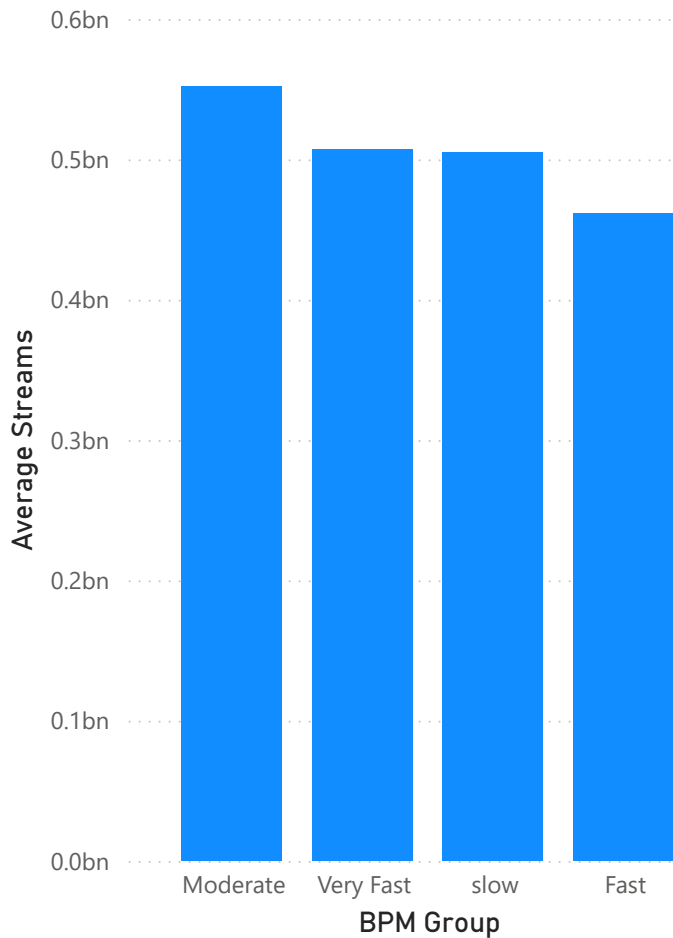

Major vs Minor Key Analysis Graphs comparing major vs minor key songs highlight that **major key tracks generally outperform minor key tracks in streams**. Differences in acousticness, valence, danceability, and energy show how musical mood influences listener engagement.

BPM & Song Performance

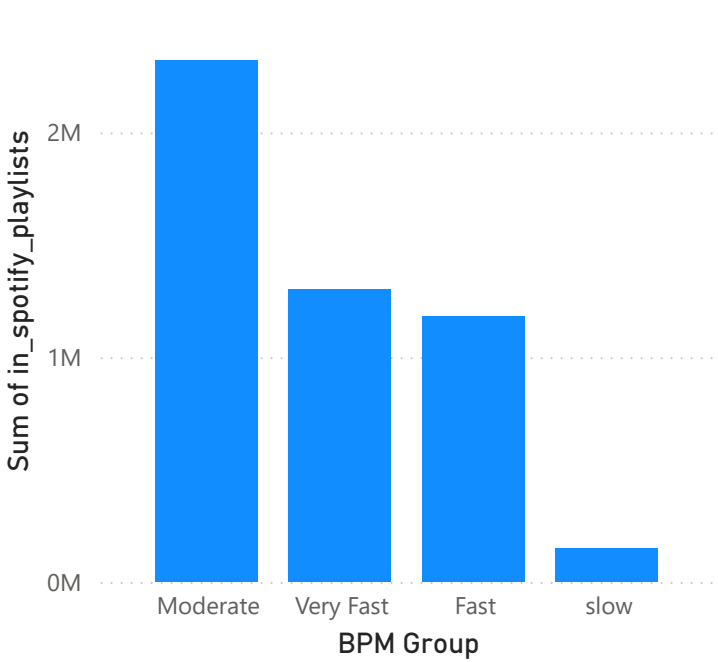

Objective

Investigate whether different tempo ranges are associated with differences in streams, playlists, charts and audio characteristics.

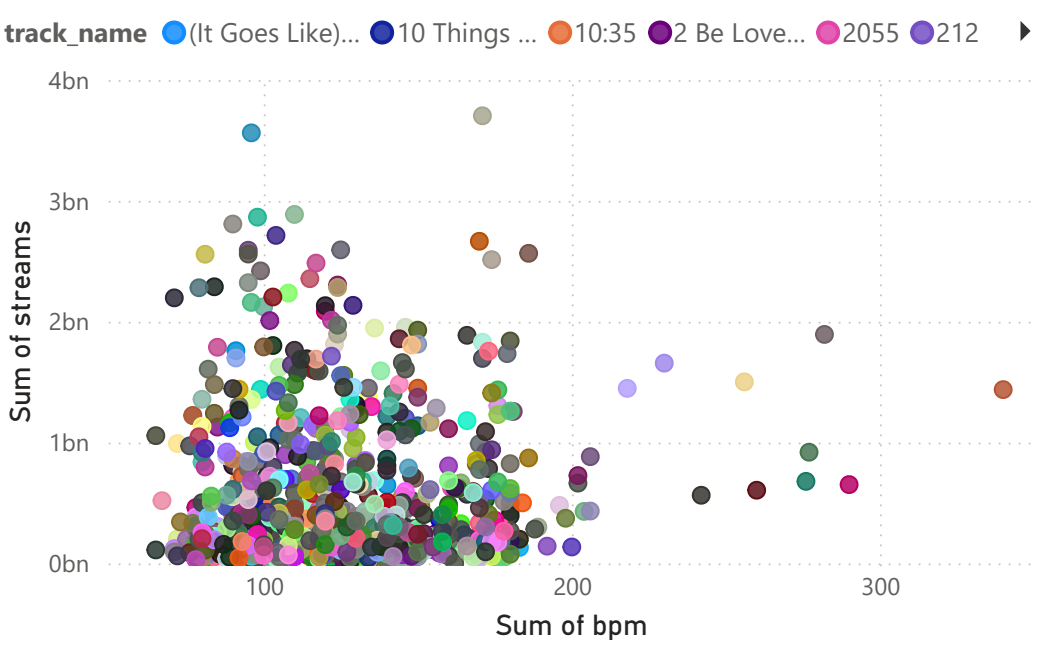

Average Streams by BPM Range

Playlist Exposure by BPM Range

Sum of bpm and Sum of streams by track_name

Audio Characteristics by BPM Range

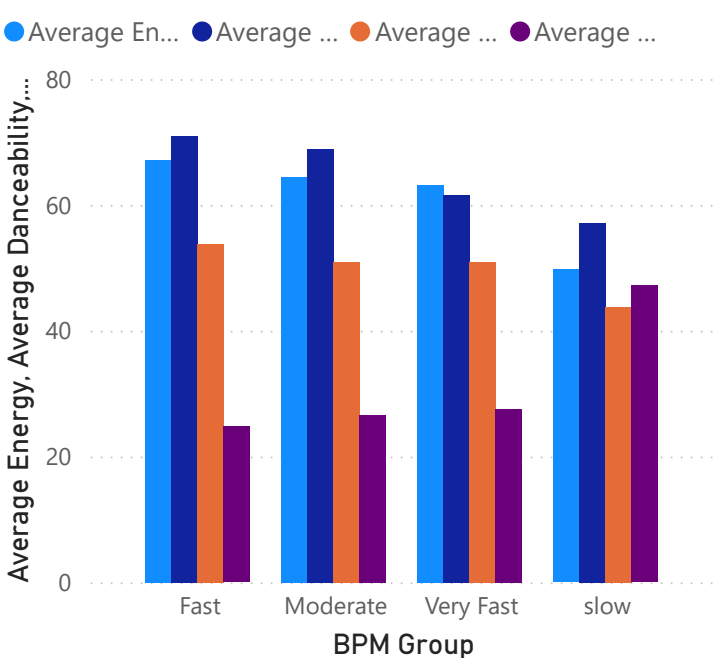

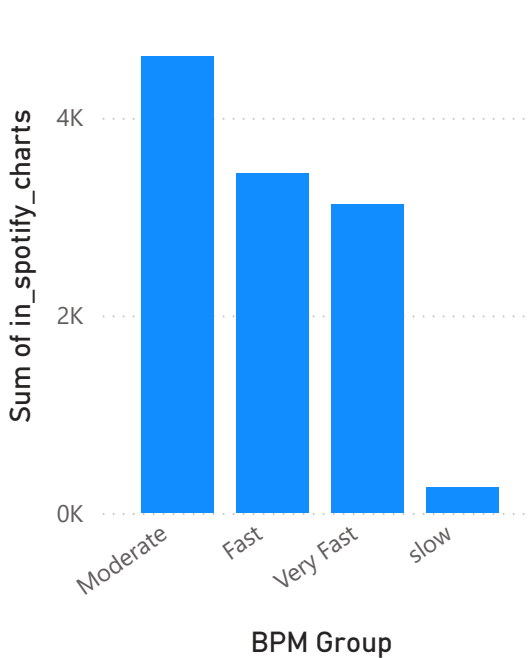

Chart Presence by BPM Range

BPM & Song Performance
Performance is broken down by tempo ranges (slow, moderate, fast, very fast). The analysis shows that **faster BPM tracks correlate with higher streams, greater playlist exposure, and stronger chart presence**. Tempo is a critical factor in shaping popularity.
